THE ABOVE STATEMENT IS NOT

A FIGHTING NEWSPAPER.

A correspondent refers to THE EVENING World as "a fighting newspaper."

But we are fighting not from any innate love of pugnacity, but because there are so many public evils that need to be fought and that can only be overcome by incessant and aggressive action.

If justice could be done the orphan, if bobtail juggernauts could be ruled off our streets, if the people could have the parks that belong to them, if policy sharps and other gamblers could be suppressed by mild sussion, we would prefer that way.

And that is why THE old, and has a distinctively German cast of fea-EVENING WORLD is and will continue to be tures. He entered railroad life in his twenty-second year as an assistant engineer on the Baltimore and " a fighting newspaper."

OPEN THE GATES.

New York is the most deficient in parks and open squares of any great city in the world.

While an effort is making to get mor breathing places in the densely populated localities, it is both illogical and shameful to lock up after sunset one of the few little parks that we have

Stuyvesant Park was given to the people not to the few rich families whose houses happen to front upon it. The mass of working men and women in that neighborhood e in only enjoy it at night. They need this part of the body from which the meat is taken. Its p easant retreat from their stifling rooms; and it is their right to have it.

Open the gates.

CHEAPER CLOTHES.

All working people of New York, whatever 2,500 souls. The place is one of peculiar interest, their politics, are entitled to and are inter- alike from its age, people, architecture, agriculture ested in getting cheaper and better clothing. carpets and blankets.

To increase by 67 per cent, the cost of these necessities by a tax that is not needed for the support of the Government is a robbery of the poor.

The vote for free wool in the House is a step towards improving the quality and lessening the cost of clothing. It is honestly believed by many able economists that free wool would also benefit the farmers, as it certainly would the manufacturers. In reducing useless taxes, those on necessi-

ties should be the first to go.

BETTER QUIT.

Two suggestions as to the Burlington and Quincy trouble came in to-day's news.

One is of a general strike by the engineers on the roads running out of Chicago in retaliation for the persecution of the Burlington men. The other is that of Chiefs ARTHUR and SARGENT and Mr. STONE, that the present strikers are willing to resume work "on any reasonable terms that might be offered."

The wise heads of the Brotherhood must be satisfied that it is time to quit the struggle for the present. The dynamite and disabling tactics of Hogz and his associates, though disapproved by the order, have so alienated the public sympathy that even just demands would not be sustained now.

Another " masher" has been mulcted in the sum of \$10. Some of the respectable uptown hote a sought to direct their engineer to turn the hose on the squad of oglers that stands in front of their doors to the great annoyance of decent girls and women.

New gnests at the Albemarie are Walter V. R. Berry, of Washington, Capt. J. J. Vandergrift, President of the United Phys. Lines, Pittsburg and Gordon Shillito, the well-known dry goods merchant of Cincianati. The "big corner in sugar" is costing the people at least \$500,000 a week. When will the law put the Trust into a corner?

Nothing is the matter with July. So far this month New York has been the pleasantest summer resort in the country.

STUYVESANT PARK

NEED IT. When the Gates of the Park Are Shut a Susset the Rights of the People Are Cut Off-The Park Commissioners Have Full Power to Keep the Portals Open, and

The residents of the Sixteenth Assembly District are almost unanimously in favor of the opening of the Stuyvesant Park during the summer evenings.

The only people who are opposed to this boon being conferred on the poor people are a few who own property facing the park.

who still believe that when the heirs of the Stuyvesant estate deeded the ground to the city it was with a proviso that the gates should be closed at sunset. As has been stated in THE EVENING WORLD, this is a misapprehension which has been handed down year after year. A reporter of THE EVENING WORLD has carefully examined the deed in the Register's office, and there is no such clause in it. On the contrary, the deed is made out in such a way as to leave no doubt whatever that the park was intended for the people and not for the property-owners of

the vicinity. The Secretary of the Public Parks Department says that the gates were closed at sun-set years ago by order of the Park Commis-sioners, and that the Commissioners have ex-clusive control of the grounds. He says the clusive control of the grounds. He says the park was dedicated to the people of the east side of the city in 1836, and that the gates were ordered shut on evenings at the request of property-owners of the immediate vicinity. There are brown-stone houses all around Madison Square, and it is not closed up evenings. There is not even a railing around it. The nabobs whose palaces surround it do not object to poor people going to that park these suitry evenings to get a whiff of air, and hundreds of men, women and children who redreds of men, women and children who reside east of Second avenue resort to Madison Square in the evenings. Stuvyesant Square is right at their doors, but they are denied entrance after sunset

Here's a Little Puzzle in the Science of Chirography.

Can any of the readers of THE EVENTED World discover to whom the accompanying Planer, wao, although ninety-three years oftage, is signature belongs? It is that of a gentleman well known in public life, and many who

gaze upon it here no doubt have spent one o more evenings where he has been present, and, in fact, the chief merry-maker. This suggestion is in the way of a little "tip." Those who think they recognize the chirography or can decipher it are at liberty to send their guesses to "The Evening World."

All but One Close Early. To the Editor of The Evening World

The early closing boom started by THE EVENING WORLD is beginning to bear fruit. All along Eighth avenue and Tenth avenue you will find the stores closed at 7 o'clock, but there is one man who has a store on Ninth but there is one man who has a store on Ninth avenue and has persistently refused to close. He has peculiar views about organized labor, taking the ground that the grocery clorks are all fools. He has made a mistake this time, as he may yet learn if the laboring people in his neighborhood do their duty.

A Drop of tak.

[Prom the Somerstile Journal.]

A drop of ink—how much it holds,
Upon my pen-point newly wet;
A britiant fancy it enfolds,
Perhaus, if I could only get
Is rightly spread about upon the sheet
Of paper, spotless, free from stain—
Alas! I gaze out in the street
And chew my pen-holder in vain.

Maybe within that inky drop
A poem lies, designed for fame;
But I can't reach Paranssus' top
Because, you see, my feet are lame.
An pigram it may contain
Replete with wisdom and with wit,
I'm sure it would not make me vain
If Fate would let me make a hit.

But while I'm speculating here,
The ink will ory upon my pen;
I'it cast saide all doubt and fear,
Maybe my Fate will noid me then.
All men of genius, I suppose,
Dash down their burning thoughts red-hot—
I'il do the same myself—here goes!—
By Jove! I've only made a blot!

passed by the Legislature and approved by

Miss Dodge is at Riverdale summering, but she has promised to devote herself to the sending his card to Congressmen William L. Scott. of Pennsylvania, who is here looking after the organization of the National Democratic Campaign Committee.

Mr. Scott came out of his room on the ground floor of the Twenty-third street side of the hotel and met Col. Lamont in the corridor. They exchanged a cordial greeting, and then retired to Mr. Scott's room.

Col. Lamont, as usual, declined to be interviewed. He said he would return to Washington this afternoon.

"I have been spending a day or two in Cortland." he said. Cortland is Col. Lamont's home and his family resides there during the work, and when the 1st of October rolls round the list of lecturers will be complete and the schedule will be inaugurated in every ward.

Already Chairman Guggenheimer has 16ceived overtures from several lecturers of known ability, and many of them enter into the spirit of the scheme—that of assisting in educating and entertaining the people. Mr. Guggenheimer's professional engage-ments are pressing, but he hopes to be able to meet Mr. O'Brien and with him call upon Mayor Hewitt te lay before him the plan

adopted.

They will ask the Board of Estimate and

Mayor Hewitt to lay before him the plan adopted.

Iney will ask the Board of Estimate and Apportionment for \$12,000, a modest sum, to be expended in providing lecturers for the first season. That will allow about \$10 for each lecture, and Chairman Guggenheimer feels assured that that sum will be sufficient for the production of good results.

The lectures will be on natural sciences and kindred subjects.

The committee hope to be able to complete all the details for the season's course by Sept. 15, when they are to make their first report to the Board.

Chairman Guggenheimer said to an Evenno World reporter this morning: "The Evenno World has every reason to feel proud of its work in offering this measure and pushing it till it became a law. Nothing has been done in years which has been so advantageous to the people as this free lecture course must surely prove to be.

"There is no method of instruction so successful as the lecture system, because it pleases while it instructs, and the poor people especially will be greatly benefited and improved by the lectures. We do not propose to provide sinecures for lecturers, but trust that those who have instruction to give will in a measure join with us, and, judging from the communications already received form lecturers of acknowledged ability, we shall not be disappointed."

Of course one lecturer might deliver his lecture three, or by a careful arrangement of dates five or six nights in a week, each an hour long, so that the probable compensation would be a fair sum.

In order that the lintent of The Evening World bill may be fully understood its text is given again:
